

INSTALLATION INSTRUCTION

LED SMART SPOTLIGHT – GU10

2 YEAR
WARRANTY

INTRODUCTION & WARRANTY

Thank you for selecting and buying V-TAC LED Lighting. V-TAC will serve you the best. Please read these instructions carefully before starting the installation and keep this manual handy for future reference. If you have any other query, please contact our dealer or local vendor from whom you have purchased the product. They are trained and ready to serve you at the best.

The warranty is valid for 2 years from the date of purchase. The warranty does not apply to damage caused by incorrect installation or abnormal wear and tear. The company gives no warranty against damage to any surface due to incorrect removal and installation of the product. The products are suitable for 10-12 Hours Daily operation. Usage of product for 24 Hours a day would void the warranty. This product is warranted for manufacturing defects only.

SAFETY WARNING

- 1) Lamps are limited to indoor use and are not advisable for use in humid environment
- 2) Lamps and lanterns cannot be installed on the surface of ordinary combustible materials. Increase in temperature is normal for lamps.
- 3) Do not exert external force or throw on the lamp.
- 4) Lamps should be stored in cool/dry place. Always make sure the environment is clean before installing the lamp.
- 5) Do not discard the lamps with regular trash. Lamps are made with electronic components and should be properly disposed at designated locations with unified treatment like traditional electronic equipment.

INSTALLATION

Step1: Disconnect the power supply and install the lamp.

Step2: Scan the given QR code, or download 'V-TAC Smart Light' from the App Store (iOS) or the Google Play Store (Android).

Cancel Select Device Type

Scanning Nearby Equipment ...

Step8: To pair the device with lamp make sure the light is blinks rapidly.

Back Add Device AP Mode

Once the light blinks rapidly, the lamp is successfully paired. If the bulb is not blinking rapidly, you can do one of the following steps:

- Switch the bulb on & off repeatedly for 3 times, with short intervals of less than 2 seconds.
- Tap the 'How to make light blink rapidly' link(as shown in the image)

Network Modes:

- EZ Mode: Light flashes twice per second
- AP mode: Slow flash, once every 2 seconds

Power on the light and confirm that light blinks rapidly

On the "Add device" page, confirm whether the bulb is on EZ mode. If not, you can switch to EZ mode by a switchig the device on three times.

Confirm if the light blinks rapidly, select the WiFi network, and enter the password.
